

MEETING YOUR SCHOOL'S UNIQUE NEEDS

Have your library your way with Alexandria's cloud-hosted catalog.

Let us handle:

- Monthly software releases with the latest features and enhancements
- Server expense, software installation and maintenance
- Daily data backups
- 24/7 live technical support
- 100% web-based - no app needed

Even if you don't have your own dedicated IT staff, Alexandria is designed to be a breeze to manage and maintain.

Search Interfaces

Having your collection readily available for your patrons is most important. After all, this is one of the main reasons library automation software is available. Alexandria's Search interface offers fun, interactive searching through icons, study programs or by simply putting a search term in and using our powerful Simple Search tool.

Ease of Use

Alexandria makes cataloging easy with integrated SmartMARC® technology, allowing you to obtain MARC records from multiple sources. Need help? Alexandria Technical Support is here 24/7 for any person, on any topic.

Quick circulation

Alexandria offers a robust, seamless circulation interface that allows you to handle all of your transactions without skipping a beat. Whether you're checking books in, placing holds, or weeding, you can do this in three clicks or less!

Custom Reports

Set it and forget it- Alexandria's reporting module allows you to run the reports you want when you need them. Whether scheduling, or quickly trying to find out how many overdue books you have, Alexandria has you covered.

Showcase and Highlight

Get students more involved in school events with Bulletin Board. From assemblies to plays to fundraisers, your library is the central hub of what's happening at school. You can create a slideshow to showcase your collection for holidays or science fairs.
