

# Alexandria<sup>®</sup> SIS Integration Bundle

Secure and automate student and faculty accounts with your SIS. When a student changes schools or classes, that student's record automatically updates in your COMPanion application and preserves their data. COMPanion's SIS Integration package works with any student information system.

You're always in control of the data you choose to share with your COMPanion applications. With easy-to-use interfaces, our applications will only receive the data you specify—whether for an entire district or specific school.

COMPanion SIS Integration Bundle supports open standards, including IMS OneRoster. COMPanion applications are automatically compatible with the format, and districts or schools can leverage OneRoster files for all of our applications.

Student Data Privacy is a top-of-mind priority, so you can help students learn in the classroom without worry. COMPanion partners with the leading SIS integration partners like Clever and GG4L who provide products and infrastructure designed, built, and tested to meet high standards of security.

Please see the list below of the options included in our SIS Integration:
