Textbook Tracker
Asset Management

Managing Assets Manages Your Budget!

Textbook Tracker is a full-featured, web-based asset management solution providing the convenience of everything you need, from circulation to reporting, in one application accessible on any internet-ready device.

Even if you don't have dedicated IT staff, Textbook Tracker powered by Alexandria™ is asset management designed to be a breeze to set up, manage, and maintain.

Do you run a Centralized or Distributed Inventory? Our Cloud-Hosted solution makes it as simple as possible to manage your assets your way in no time at all!
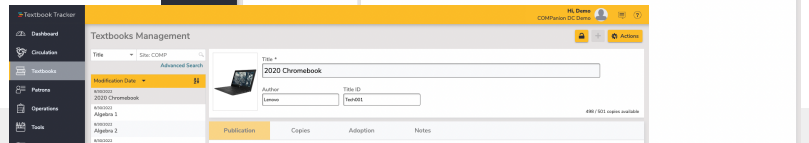

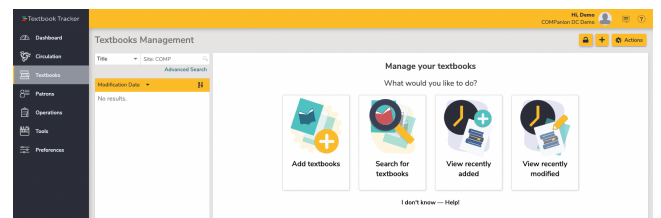

• *Track asset depreciation*   • *Assess condition/damage/loss/fees*   • *Automate inventory and supply*
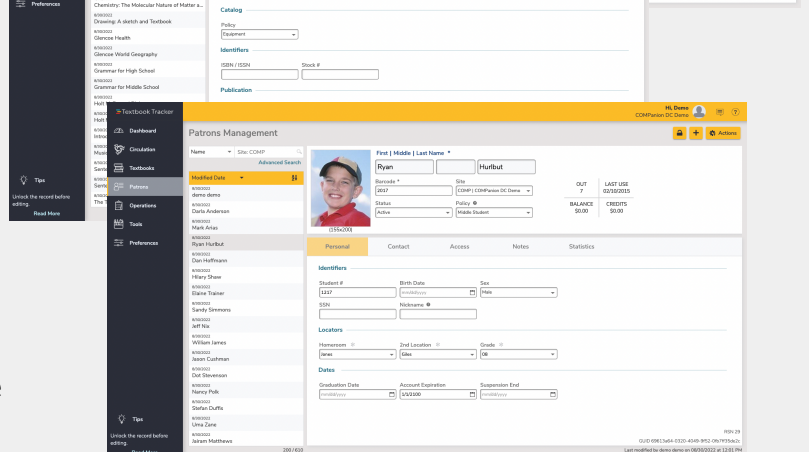

Automated Reporting

Whether you need information on-the-fly or want to set up a structured schedule, you make the call when it comes to reports. Now you can have reports when you want them, not when it's convenient for your system. After all, asset software is supposed to be all about automation.

24/7 Live Support

Any person in your organization, any hour of the day, any topic. No other asset management software has their own in-house 24/7 support team like we do. Got a basic "how-to" question? Give us a call. No matter how simple or complex, we will do what it takes to help, including a live database assessment where we log directly in your system for a full diagnostic.
