

# Alexandria®

## PATRON MANAGEMENT MADE SIMPLE WITH ONEROSTER COMPLIANCE

We are dedicated to providing you the tools to succeed.  
That is why we are the only library automation software to partner with OneRoster® compliant products.

### AUTOMATIC

Student roster information automatically updates in Alexandria each day.

Automate daily additions, edits, and graduations.

### SAFE AND SECURE

School administrators can be assured that privacy and security protocols are met.

Our partnership with certified **OneRoster®** products like **Clever** and **SchoolDays** will provide the channel for Alexandria to access all student data in a standardized way. Alexandria's SIS Integration will relieve teachers, librarians, and administrators from managing rosters throughout the year by transferring data between your student information system and Alexandria.
